Design Entry Template Guidelines

You will find the following slides in this Submission Template with specific titles and requirements for your submission as indicated below. Total number of your submission should not exceed 14 slides, beginning with (Slide 1: Project Name) and ends with (Slide 14: Appendix).

SLIDE 1:

Project Name Input a concept title that reflects your idea.

SLIDE 2:

Design Concept Describe your concept in a nutshell, keep it within 150 words.

SLIDE 3:

Design: Floorplan and Elevations Organize your drawings to tell your story.

SLIDES 4-10:

Design: Visuals Present your concept with your renderings.

- Slide 4: Overview
- Slide 5: Full Bathroom
- Slide 6: Shower Area
- Slide 7: Toilet Area
- Slide 8: Basin Area

SLIDE 11-12:

Specifications: Colors, Materials and Finishes

SLIDE 13:

American Standard Products Specified List down the products that are used in your design.

SLIDE 14: Appendix Elaborate your design story.

Lost in Forest: Inhale & exhale

Participant ID ASDA24-20037

Design Concept Summary

The tropical hospitality bathroom strives to bring nature into the space while keeping things private, though this can limit how we use the area. My goal is to overcome these constraints with multifunctional design.

- I aimed for a **Balance**, ensuring each area—vanity, bathtub, shower, and toilet—is user-friendly.
- Seamless traffic in the space, while opening the horizon through linkable design from floor to ceiling.
- Sanitary products, chosen for their functions and cleanliness, fill the area with shiny surfaces and fit for everyone.
- **Material** are implied through, the welcoming touch of wooden doors in the shower and toilet area seamlessly blends with sustainable features like glass block and one-sided glass. These elements allow natural light to dance upon the grey tile and polished concrete, creating a warm, stone-like ambiance. The addition of white tiles in the shower and toilet enhances the overall atmosphere, offering a relaxing and inviting environment while promoting cleanliness and sustainability.

TOILET

The space is design to welcome the user at the center by adding ambient sanitary product as a delusional sculpture while vibrant the design with two vertical LED stripe. Each sanitary is glossy for its chrome surface create a clean space through its reflection. Furthermore, The location and height where they are placed are purposely put to minimize for space incident.

Through color tone and product selection, this toilet will perform the hollow space with utility the allow user to fully have the home toilet accessibility while adding the fragrance to enhance the smell for the overall performance.

From every corner of the space, this semi-private space inhales the energy from the surrounding and exhale the tightening feeling through design and greenery view. Via this one-way glass and glass block, give no worry to privacy loss. This fluidity shape that flows through air lower eye distraction while creating calm and sense of touches through the materials. Some equipment are hidden underneath to allow users to fully functionate the upper space widely. Since reflective glossy is sensitive to slippery, the linear bath textile adding indirect sense of awareness to the space.

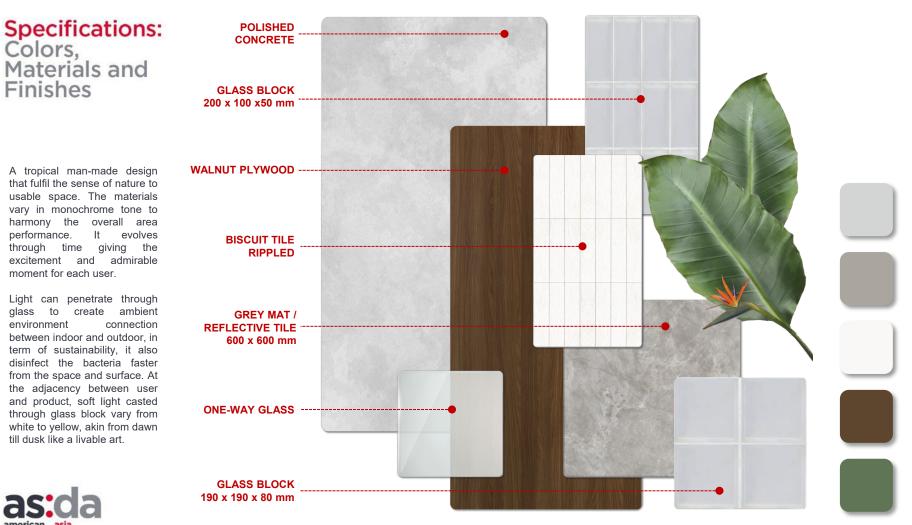

A tropical man-made design that fulfil the sense of nature to usable space. The materials vary in monochrome tone to harmony the overall area performance. lt evolves through time giving the excitement and admirable moment for each user.

Colors, Materials and

Finishes

Light can penetrate through glass to create ambient connection environment between indoor and outdoor. in term of sustainability, it also disinfect the bacteria faster from the space and surface. At the adjacency between user and product, soft light casted through glass block vary from white to yellow, akin from dawn till dusk like a livable art.

Design Story – *Limit to 150 words per answer.*

• What is the inspiration for your design?

In the bustling landscape of the 21st-century urban revolution, where the incessant demands of modern life often leave individuals stressed and mentally fatigued, the need for respite becomes paramount. Acknowledging the need for an escape, our tropical bathroom beckons guests to a "home away from home". Imagine stepping into our bathroom design like flipping through the pages of an adventure story inspired by nature. It's like uncovering a hidden waterfall in a lush forest, full of mystery and excitement. This space is crafted to be a comforting escape from hectic city life, a retreat for tired minds. Picture yourself surrounded by the soothing sounds of tropical birds and flowing water, finding peace in a place where homey comforts blend seamlessly with the thrill of exploration. My concept creates a simple, relatable story—an escape from the ordinary, inviting guests to rediscover joy and connect with the healing power of nature.

How does the design fulfill the need of the target users?

Travelers who go on a trip away from home, their similar scope is to seek for a second homey refuge to heal their mental and physical stress during their break time. My design is suitable for a tropical hotel room of 2 to 4 people stay. Typically, **deriving from the casual activities flow that normally happen**, people who have their tight schedule during the stay, they just share the space at a time, like Person A uses the vanity space, Person B uses the shower while the rest can have the remaining function. **Product placement** was critically thought based on Architecture Data; furthermore, I dived deep into the design that based on different scenarios to reduce the circulation flaw and incident within the space. **Material selection** is the vital part that deforms a sense of hygiene, openness and welcome to the overall appearance.

How does the design fulfill the design challenge?

Commonly, the bathroom is isolated and designed within the space. How about the design that opens its energy to both connectivity between all indoor functions and outdoor view like breath in and out? How to reconnect the space after division? Can this space become more convenient time after time? These are the must-answer questions to lead to a successful bathroom. I explore through space through emotion, to tackle the tight space after separation, smoothness of eye with the seamless design is implemented. Material Selection is quite challenging to harmony the space and create calm. Creating a sustainable anti-bacterial killer is quite challenging, even though using the reflective material but without enough sunlight, there might be the remaining bacteria and stain. So, placing glass where sunlight can cast in for effective cleaning, while glass block allows soft light inside.

How does the choice of products contribute to the purpose of the design?

First of all, to select the right product, I identified the design and user experience through each facility and try to find the answer to the question **"Is this or that product user-friendly in term of form, function, color and location?"** so that I could place the product correctly. I determined the sanitary to be inspired from the design. Then, by overlooking the detail of its form, function, and color to make sure it's suitable for each area. In my design process, I already spared the space for the product to be placed. Furthermore, inside each facility, the products that I select from collection to customization are varied on 2 intentions to vibrant my design, allow every generation to able to use and learn about the product faster, and provide easiness for further usage and maintenance.

Let your ideas change the way we perceive hospitality bathroom spaces
