

Purposeful Design Transforming the Way We Live

Design Entry Template

MODERN STYLE HOSPITALITY BATHROOM OF A BOUTIQUE HOTEL.

ASDA22-30117

Design Concept

Modern design is a style of decor that focuses on minimalism, neutral colors, clean design lines and environmentally-friendly materials

Black is a classy bold color. It is associated with power, mystery, strength and refinery. This color is great for those who want to exude real strength and classiness. It's great for a vintage look. It is crucial to use black marble in a spacious and light-filled room to main the combination of light and dark. So the Slight Light emperador anti slip marble is used with black and white natural marble.

Lighting or illumination is the deliberate use of light to achieve practical or aesthetic effects. Lighting includes the use of both artificial light sources like lamps and light fixtures, as well as natural illumination by capturing daylight

A hotel room is used by the guests on leisure trips and business trips . Every one needs a place where they can find their own space. A bathroom is a main part of a room as that covers the whole idea of a boutique hotel and it should be good for health and hygiene

When you enter the bathroom you will see great color combination around you of black and cream and great supplies which are used in the design.

Backlit mirrors are used in bathroom because the lights are behind the mirrors which creates a subtle and useful glow. LED-backlit mirrors are energy-saving and can last longer as compared to other light bulbs.

Nowadays, the use of plants in modern interior design is getting more and more popular. Not only making spaces more appealing and alive, they also play a role in your overall health. Indoor plants can be used as accent pieces, to soften areas or even to create a certain expression.

Design: Floor Plan and Elevations

The space is of 9-10 sqm, of boutique hotel bathroom. Most often, a bathroom either has a tub or a shower. Sometimes it has both but one definitely stands out. But when both the tub and the shower are as amazing as these ones, then you have a luxury bathroom. In here, it's a wonderful combination of beautiful, natural material, graceful shapes and wonderful transparency. Two basins are used so that the users can use the space with their partners. The space is not cluttered it looks clean and has a comfortable space for a person. The modern concept, health and wealth being theme is kept in mind while designing this space,

Elevations

Design Visuals: Full Bathroom

The bathroom is designed With the modernism, health and well being kept in mind.

The products of The American standard has helped to full fill the theme of the design.

The marbles and the light effects give us a calm feeling and it feels relaxing. When we enter we can see two mirrors with classy sleek basins which are on marble platform. On left there is a automatic WC which stands the main role for health and hygiene. On the right we see a modern sleek bathtub. There is celling concealed shower which will create a great experience for shower . We also have wall concealed shower installed.

Design Visuals: Shower Area

“Wash Away Your Troubles with Some Bubbles”

I have used Ceiling concealed shower as it is Air-infused water and provides a luxurious shower experience while using lesser water.

I have also used Body shower with concealed body and hand shower too.

I have used easy set bath and shower mixers. The conceal thermostatic mixer provides a constant and comfortable temperature.

The play button adjusts the volume of water easily and offers daily convenience at the push of a button. Plants are placed near the shower area so that the user feels connected to nature

Design Visuals: Toilet Area

Smart toilet plat has The remote and all contact points are made of materials containing bacterial growth inhibitors. Especially on the seat covers, Which has been certified to prevent and suppresses bacteria and has many other advantages. The purifying injecting lines made from high quality materials durable operation the water is not too strong, so it's perfect for ladies. This toilet area is designed by keeping health and hygiene in mind.

Design Visuals: Basin Area

The design has Two basins together because there are visitors who like to share the bathroom with someone. I have used 3 hole basins so that it could help to give out hot and cold water.

I have given a place or platform below the basin counter which has small towels for the users. I have given planters so that the users feel connected to the nature,
