

# **HYGGE**

## **Quality Living in Simplicity**

### **ASDA22-80677**

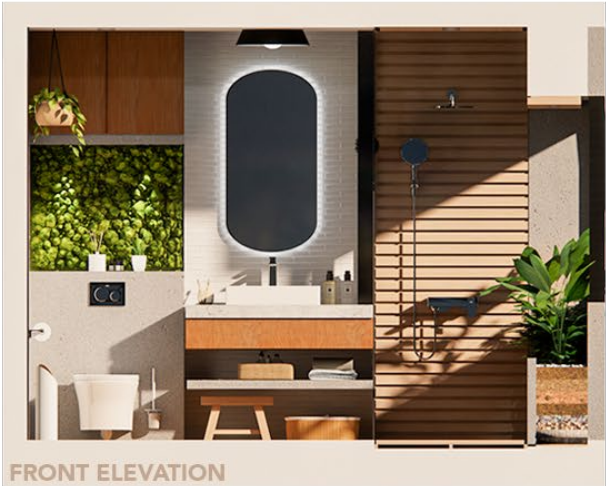

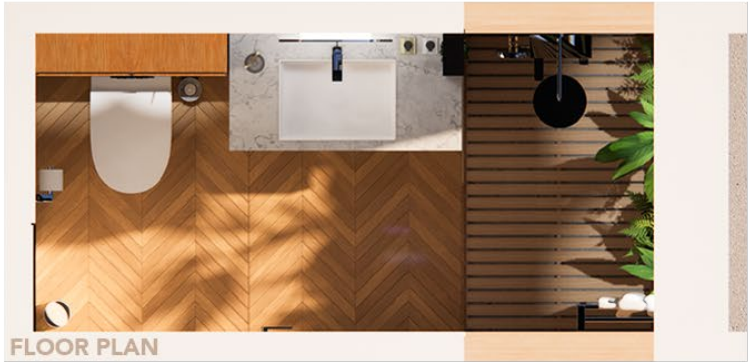

## Design Concept

With the idea of gaining back the sense of ease despite being surrounded by a fast-paced world, the bathroom design was anchored on creating an environment that brings out **Hygge**, a quality of coziness and comfortable conviviality that engenders a feeling of contentment and well-being. Hygge is not something that is forced. Instead, it is more of a natural feeling achieved when everything falls into its proper place. And so, the bathroom design revolves around giving the users a **better quality of life through simple living**. The simple and intentional approach of the bathroom design allowed the space to attain comfort without the need to sacrifice its purpose and efficiency for the users' daily needs.

# Design Visuals: Optional Images

The sand filtration system made it possible for the micro garden to be self-sustaining by filtering the grey water from the shower area.

The moss and micro garden helps to lessen the humidity inside the bathroom.
