

# Flow: Transitioning to an Innovative Hospitality Design

## ASDA22-80613

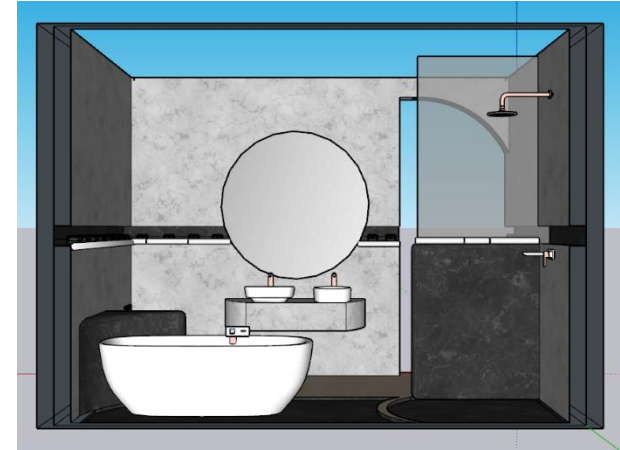

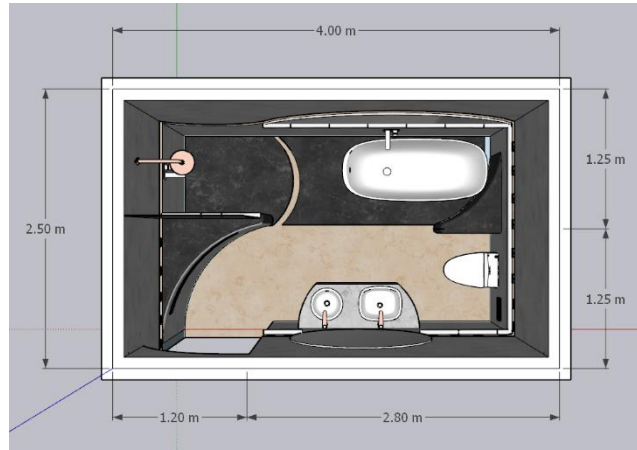

# Design Concept

Amidst the challenging times of the pandemic, we must move forward and adapt in order to progress. We have to flow with the tides of life. As a designer, there is utmost importance to integrate steadiness and continuity in design, especially in our daily lives. Transitioning is essential but flowing with innovative and inviting purpose is the key towards a user-centric world of design.

# Design: Floor Plan and Elevations

I wanted to design the bathroom space with an open plan that minimizes transmission points of the COVID-19 Virus of touch.

The curves represent the transition of the outer world into a more introspective bathroom experience that enables reflection of what is important in health and safety.

# Design Visuals: Full Bathroom

Key design elements include:

- Air Sanitation Devices
- Mounted Vanity
- Backlit Mirrors
- Wall Shelves
- Motion Sensor Light Switch
- Minimized Touch Points
- No Door
- Integrated Lighting
- No Slip Tiles
- Antimicrobial Copper
- Plants

## Design Visuals: Optional Images

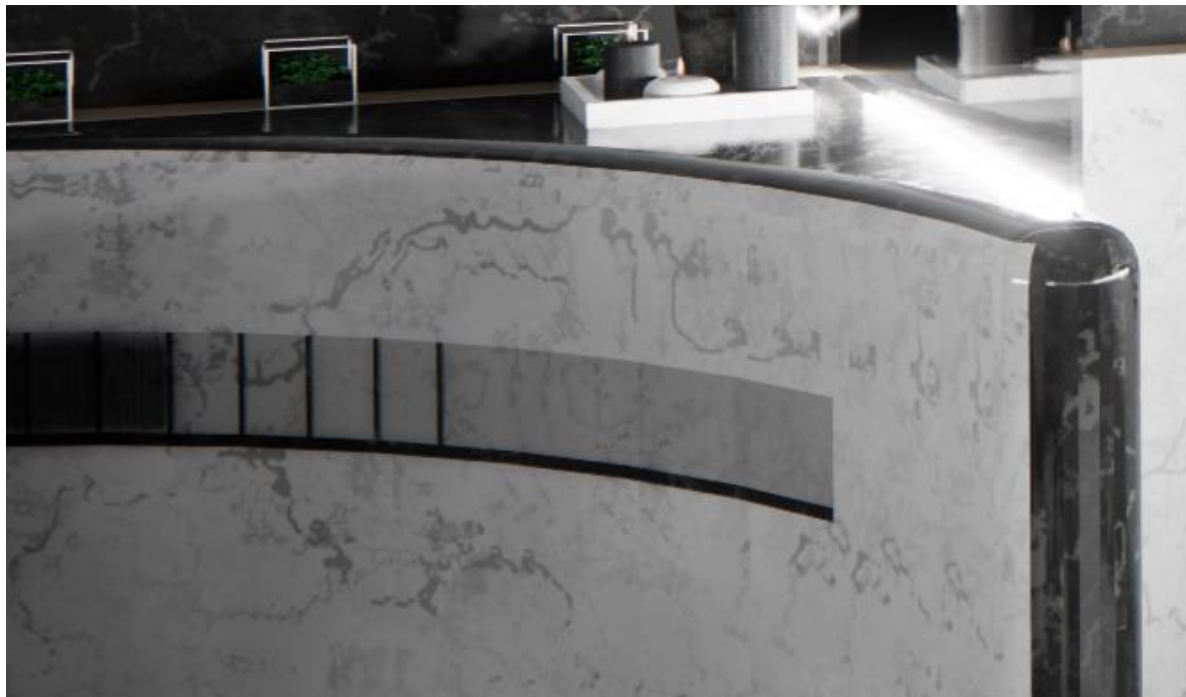

Air purifiers or sanitation holes are located at the top side of the wall openings all around the bathroom. Plants were also placed there to promote a healthy and green atmosphere that enables proper airflow.

## Design Visuals: Optional Images

Motion tracking sensor to control the lighting in the interior of the bathroom. Strategically placed in the entrance of the bathroom with self induced mechanics guided by the flow of the curve.

## Specifications: Colors, Materials and Finishes

Colors: Modern blend of contrasting white and black with a touch of copper in some finishes.

Materials: White marble was used to give a luxurious atmosphere. Black marble was used to contrast the walls with lowkey detailing.

Finishes: Utilized American Standard Products but switched main touch areas like handles with antimicrobial copper .

# American Standard Products Specified

Faucet: FFAS1702

Bath Knobs FFAS1304

Bath Tub: BTAS9761

Basin 1: CCAS0626

Basin 2: CCASF605

Toilet: CEAS5315
