

A Home to Love A Space for Everyone Design Entry Template

Design Entry Template Guidelines

You will find the following slides in this Submission Template with specific titles and requirements for your submission as indicated below. Total number of your submission should not exceed 13 slides, beginning with (Slide 1: Project Name) and ends with (Slide 13: Appendix).

SLIDE 1:
Project Name

Input a concept title that reflects your idea.

SLIDE 2:
Design Concept

Describe your concept in a nutshell, keep it within 150 words.

SLIDE 3:
Design: Floorplan and Elevations

Organize your drawings to tell your story.

SLIDES 4-9:
Design: Visuals

Present your concept with your renderings.

- Slide 4: Full Bathroom
- Slide 5: Shower Area
- Slide 6: Toilet Area
- Slide 7: Basin Area
- Slide 8-9: Optional Images

SLIDE 10-11:
Specifications: Colors, Materials and Finishes

SLIDE 12:
American Standard Products Specified

List down the products that are used in your design.

SLIDE 13:
Appendix

Elaborate your design story.

RESPONSIBLE INTEGRATED NON-ANGLED DESIGN

Multifunctional modern bathroom that
serve multigenerational family needs in all
aspects

ASDA23-40254

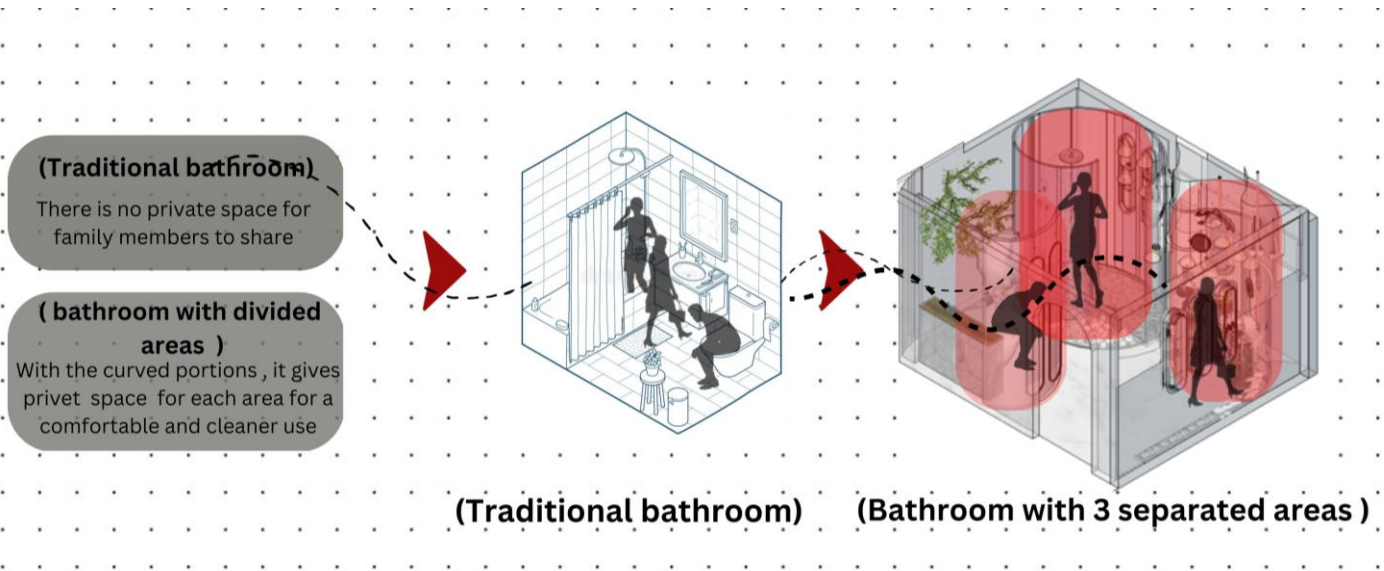

Design Concept Summary

The concept of this design was to create multifunctional bathroom for multigenerational family and to create a sense of different spaces by defining the area into zones. To serve the purpose of multiple use of the bathroom, the curvy non-angled design inspired from the water movement element, which is in nature of a curvy shape to save spaces and divided areas. The curvy wall is essential in small bathroom portions to give wide long walls to appear with more space and smooth relaxing area.

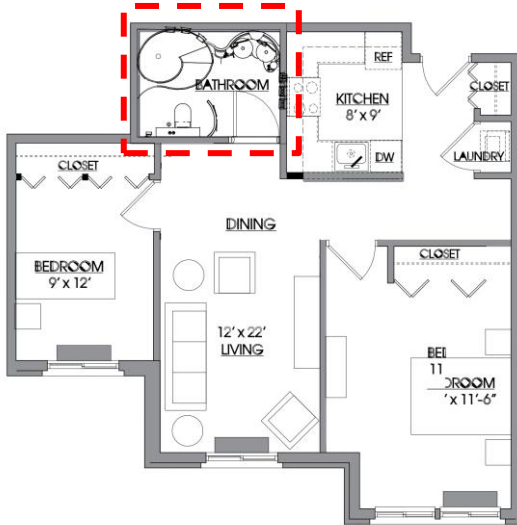

The bathroom has been designed with complete hygiene in consideration. In terms of both functionality and atmosphere, I wanted to create a bathroom that would make family and visitors feel comfortable and classy yet relaxing and brings spa vibes and a touch of the outside, inside. In collaboration with the planning and installation of materials, all the tiles are white, including those with negative ion and anti-bacterial properties, and moisture control. To provide an integrated bathroom that serves all family needs, both practical and aesthetic points, taking into account the safety of the elderly and all family members.

Target users :

TOILET AREA

Design Visuals: Shower Area

Wet area enclosing part of the wet area. the spiral shower area, this design makes the area enjoy privacy, as well as providing space for the small bathroom. The shower room will be made of cross reeded glass so it provides Privacy area while showering. There is space to sit or Standing in the shower. Also, there is ramp with LED to promote accessibility and for safety for the elderly , there are built-in storage shelves used to make use of the space as well Ceiling shower to add Natural bathroom feel. decorated with warm lights User feels as comfortable like possible.

Design Visuals: Toilet Area

The toilet area, which is the part where most germs accumulate, so a barrier must be installed

The curved glass partition is made of opaque glass to isolate the area so that the bathroom can be used by more than one person.

There are also handles for the elderly. Houseplants in the area improve air quality and make the place more relaxing. There is also a shelf with hidden lighting to store books and perfumes.

There are open and closed waste bins for ladies and put a Boston fern for adding air purification properties.

Design Visuals: Basin Area

In the basin area, there are two basins of different heights, one long for adults and the other a little shorter for young children to take advantage of the space and time where the mother and child can use them together, especially in the morning

There are also two mirrors that can change the angle and length for easier use for all family members. There is also a small curved separator to separate the two washbasins to prevent water splashes.

The decor and dim lighting with the curved design make the place feel relaxing and modern for the family

Design Visuals: Optional Images/ Information

in each of all three main areas, there are built-in storage shelves to provide storage space in the small bathroom, as family members always need that space, so the shelves built into the wall save space and make the bathroom clean and keep it spacious. The hidden lights in the built-in shelves add an elegant and clean touch and save space and energy

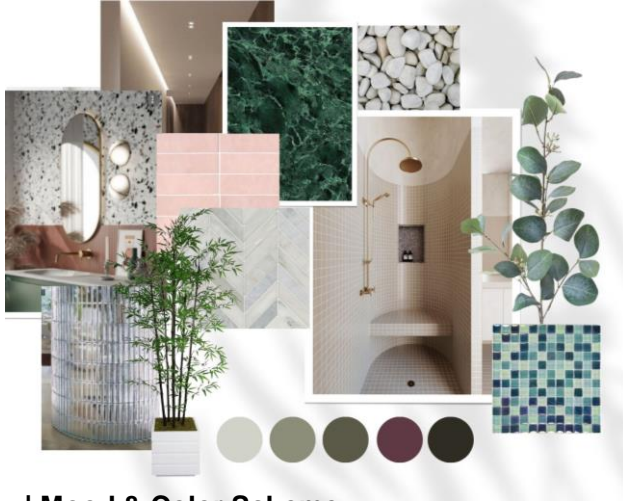

Design Visuals: Optional Images/ Information

What the family and guests will get is Confidence in cleanliness in the Bathroom as well as its unique design serve all the goal purposes and give spa relaxing vibes and amenities also Focus on fully Safety and comfort for all ages of the family and their needs. The white colour of the bathroom makes it reflect the colours in the bathroom beautifully. The curved design also makes the place more spacious and provides privacy and modernity the bathroom location in the middle of the house make it accessible to all the needs of the family and guests as well.

Specifications: Colors, Materials and Finishes

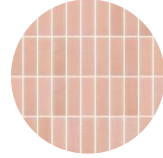

| Mood & Color Scheme

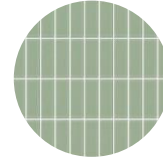

Overall the colours used in the bathroom are white and green. In the main three areas there are different shades of colours and slight change in materials to make the place look more spaciousness and to serve the purpose of the area. Different shades of green give different Ambiances in space. For example, green marble tiles in muted tones create a calm and luxurious space, while white reflects the other colours as a neutral element and to make The bathroom look clean and spacious

The materials used is harmony varied to serve the desired goals and Create a sense of space by defining area into zones

Wall vertical Panelled-effect half walls are used to add character and give ornate and spacious look. The basin sits on white marble block, which ties the two looks together. Built-in shelves adds to the linear look and provides additional space for accessories. Large mirrors, over the bathroom basin, bounce the natural light around the area.

Specifications: Colors, Materials and Finishes

A spiral walk-in shower with frameless reeded glass panels also located in the toilet area looks barely there and give the bathroom elegance and helping to create the illusion of space

Built - in shelves in the shower, basin and toilet area walls Make the most of the wall. Saving surface space, the white gravel stone creates a stunning feature on the bathroom and brings spa vibes and a touch of the outside, inside.

Appendix

Design Story – Limit to 150 words per answer.

- What is the inspiration for your design?

my inspiration for this design is the organic shape from water movement and sea shells as the spiral shape. they naturally provide space and give isolation somewhat, which is what I wanted to show in the bathroom, my family, as it contains people of all ages, from the elderly to children where I want to divide the spaces into zones in an innovative and elegant way to make it The place can be used by more than one person to solve the problem of Inconsistency in using the bathroom in the large family I also made priority for the elderly, and kids as the bathroom is equipped with safety equipment for them. The curved design and the materials used made the place elegant and distinctive to solve the problem of the family bathroom, which usually lacks an aesthetic sense. and brings spa vibes and a touch of the outside, inside.

- How does the design fulfill the need of the target users?

. I wanted to create a bathroom that would make family and guests feel cosy, stylish, and relaxing while still being practical. Complete hygiene has been taken into account in the bathroom's design.. in combination with the preparation and placement of the materials. Even tiles with moisture control, anti-bacterial, and negative ion qualities. To provide an integrated bathroom that meets all family needs while also being aesthetically pleasing and keeping in mind the safety of all family members, especially the elderly and kids where the unity slip tiles been installed as well as ramp with LED, hand grab and the foldable chair etc..

- How does the design fulfill the design challenge?

The design combines practicality, multifunctionality, and the aesthetic aspect to family comfort of all ages. The challenge is to combine these three points in one design and think about solving all problems, taking into account the safety and comfort of the elderly and children, the non angled bathroom design make it unique as well as give spacious and more privacy to the bathroom especially the location of the bathroom in the middle of the house, making it easy to reach for every one in the house

- How does the choice of products contribute to the purpose of the design?

The products contributed greatly to defining the design and the scope of the many choices, which gave me the ease of choosing what suits the design in terms of functionality modernity and shape , such as the signature product like the visual basin I used the Aqua Ceramic marital make it Super hydrophilic and prevents dirt and suet the design nicely .the Plat 4 Smart Toilet I choose It contains features such as auto flash and auto seat and cover essential for the elderly , kids or the special need Where they do not need to bend over and are easy for young children, as it kept the place sterile and clean at all times furthermore in the shower area the foldable seat is Essential for the elderly and special needs to seat and shower safely
