Design Concept Summary

Journey - the design is approached by introducing a space which is more open and inviting to the user , with also taking care of the privacy of the users.

A place that is used by all generations needs to be very functional as in terms of usage. A place where people of the house can carry out activities at the same time. Toilet and shower spaces are separated with walls for it to be easily accessible at all time .

There are 2 doors to reach the bathroom , one which connects the bathroom with the main living spaces in the house and other where the door connects to a transition space which can in turn connect to the service spaces in the house .

Use of abstracted form of muqarnas is used in the ceiling in the form of wooden installation .

Muqarnas is an ornamentation element applied in Islamic architecture.

Design: Floor Plan and Elevations

ELEVATION

ELEVATION

The bathroom measures up to 6.8 sqm of total area excluding the wall thickness.
The total height of the bathroom is 2.7 m

Toilet
Area**

Handrails are provided on both adjacent walls of the bathroom for safety and easy usage for the elderly .

Design Visuals: Basin Area

Located at the arch window in the bathroom .
Because of it being a shared space ,it needs to be easily accessible for children . the basin is at a height where children can access it easily. Providing touch-free faucet for effortless use.

Automatic Infrared Sensor
Touchless Faucet Bathroom

Design Visuals: Optional Images/ Information

Design is based on aesthetics of bathroom ceiling . Based on Muqarnas, here the roof was abstracted in such a way to give a little edge to the design . The play of edges and curves can be seen in the design .

Wood installation is done on the ceiling which hangs from the slab .

Design Visuals: Optional Images/ Information

Design idea was to connect the bathroom to a outdoor space connected to the bathroom where elderly can sit till the bathroom is vacant if occupied.

The design thinking was to have a seamless flow of space , incorporating a technique where the main 2 entrance door to the bathroom can be flushed into a wall having racks . The toilet accessories can be hidden away .

Specifications: Colors, Materials and Finishes

Wood used for to ceiling

Wood for basin area and rack

Smooth plastered wall

Marble used for flooring

Creepers used in the veranda

Bronze color is used

American Standard Products Specified

Acacia Supasleek Vessel 550mm
Model No.: CCASF412-1000410F0;
WP-F412-WT

Moonshadow D20s Rainshower-
direct Mounting
Model No.: F46110-CHACT903; A-
6110-978-903

Acacia Evolution Tissue Holder
Model No.: F51387-CHADY55;
K-1387-55-N

Acacia Evolution Vortex Wall Hung 3/4.5l
Comp Set Wt
Model No. : CL31197-6DACTPT; 3119-WT-0

Acacia Evolution Towel Ring
Model No.: F51390-CHADY47;
K-1390-47-N

Milano Concealed Shower Mixer
Model No.: FFAS0922-7T2500BT0

Easyset For Hand Shower
Model No.: FFAS0925-709500BC0

Appendix

Design Story – *Limit to 150 words per answer.*

- What is the inspiration for your design?

Muqarnas- a form of ornamented vaulting in Islamic architecture . Muqarnas can often be seen on flat surfaces and crown doors, mihrab quarters, transition elements, and balconies. Generally bathroom ceilings are left unnoticed , this wood cladded ceiling installation gives a element of surprise .The color palette of the bathroom is carefully decided with light color scheme to emphasize more on the ceiling . Toilet and shower area are open from above to feel the visual continuity of the ceiling .

- How does the design fulfill the need of the target users?

Considering the users , all the heights in the bathroom which are the basin ,rack ,door handle are reachable by adults and children . There are handles provided in the bathroom for safety of the elderly .

Considering the usage of the bathroom it needs to have separated toilet and bathroom for more people to use at once. Providing a siting space for the bathroom is necessary considering the elderly ,when the bathroom is full one can sit in the veranda outside.

- How does the design fulfill the design challenge?

Here the design is modifiable. when there are children in the house ,the design approach should be free flowing instead of rigid having one enclosed block of space ,this creates easy movement all throughout the space. When the bathroom is being used by more people ,the doors of the bathroom entrance can be opened and placed seamlessly into the wall to make it a open space used by everyone . User can access the whole bathroom by closing both the doors.

- How does the choice of products contribute to the purpose of the design?

By using **Acacia Evolution Vortex Wall Hung 3/4.5l Comp Set Wt** maximum space can be utilized in the toilet ,the sleek look of the product goes hand in hand with the design.

Use of touch less faucet helps in effortless use. Sometimes young kids can not seem to reach the faucet handle ,use of this touchless faucet tackles this issue.

Also helps to save water which is very crucial problem around the world.

Basin and shower are chosen to match with the users needs and also to match with the overall scheme of the bathroom .
