## Design Entry Template

# Design Entry Template Guidelines

You will find the following slides in this Submission Template with specific titles and requirements for your submission as indicated below. Total number of your submission should not exceed 15 slides, beginning with (Slide 1: Project Name) and ends with (Slide 15: Qualification Checklist).

**SLIDE 1:**  
**Project Name**

Input a concept title that reflects your idea.

**SLIDE 2:**  
**Design Concept**

Describe your concept in a nutshell,  
keep it within 150 words.

**SLIDE 3:**  
**Design: Floorplan and Elevations**

Organize your drawings to tell your story.

**SLIDES 4-10:**  
**Design: Visuals**

Present your concept with your renderings.

- Slide 4: Overview
- Slide 5: Full Bathroom
- Slide 6: Shower Area
- Slide 7: Toilet Area
- Slide 8: Basin Area
- Slide 9 & 10: Optional Images/Information

**SLIDE 11-12:**  
**Specifications: Colors, Materials and Finishes**

**SLIDE 13:**  
**American Standard Products Specified**  
List down the products that are used in your design.

**SLIDE 14:**  
**Appendix**  
Elaborate your design story.

**SLIDE 15:**  
**Qualification Checklist**  
Before submission, review this list.

Participant ID : ASDA26-52004

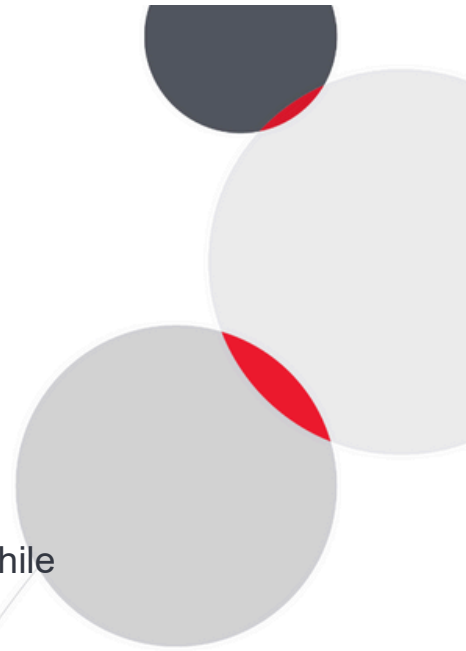

# Design Concept Summary

This project proposes a bathroom for a three-generation family within a limited apartment.

By separating bathing, washing, and toilet zones, it supports simultaneous use while maintaining privacy.

Inspired by rural childhood memories, warm materials and translucent surfaces create a quiet sense of connection through light and everyday rituals.

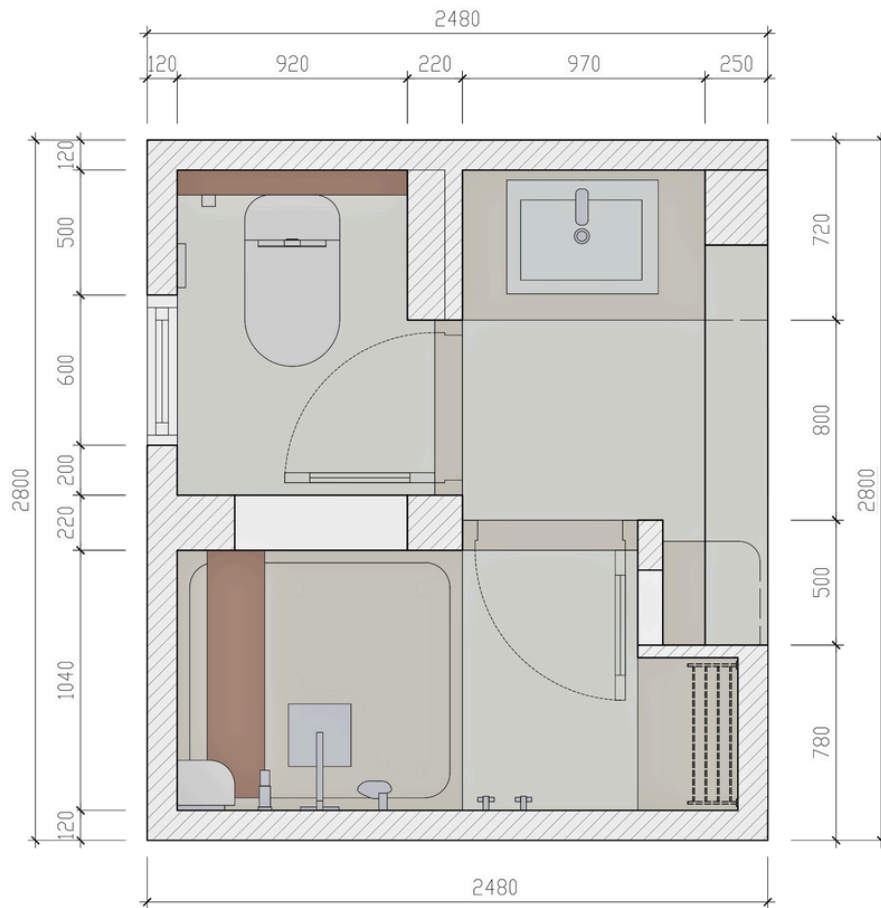

# Design: Floor Plan and Elevations

The multi-generational bathroom is divided into three independent sanitary zones, allowing multiple users to use the space efficiently at the same time.

Inward-opening doors are used to reduce circulation space outside the bathroom and optimize the overall layout.

The standing shower is combined with a shallow bathtub beneath, clearly separating wet and dry areas. This flexible element functions as a shallow tub for children to play with water, a washing area for adults, and a foot-soaking space for elderly users.

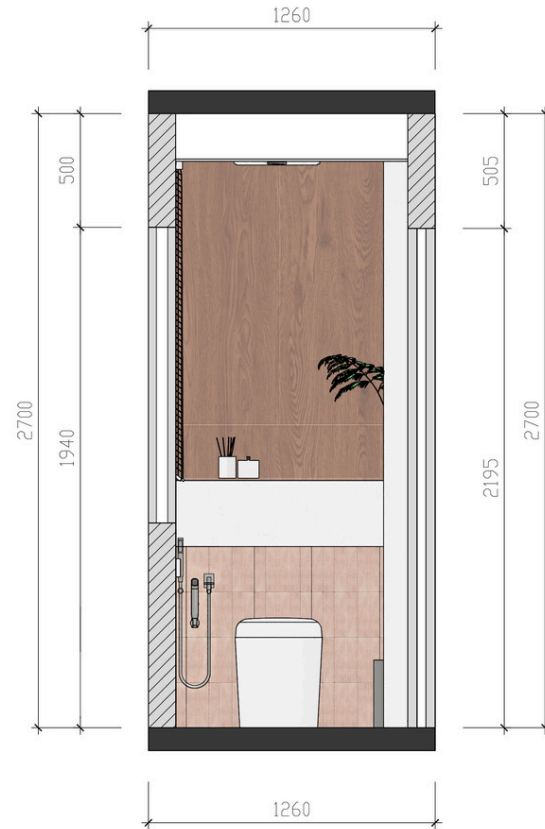

**Total Bathroom Area  
in sqm (including wall  
& columns)**

**6,9m<sup>2</sup>**

# American Standard Products Specified

	Product Name	Product Image	Reason for Selection
1	E-lite Shower Toilet (Auto Open, Plug0)		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.
2	Acacia Evolution Wall-Mount Shower Arm		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.
3	DuoSTiX™ Hygiene Spray (Chrome/Matte Black)		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.
4	Wall-Outlet-with-Holder-Square RainClick 130 Round 3F Hand Shower_Brushed Hard Graphite		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.

# American Standard Products Specified

	Product Name	Product Image	Reason for Selection
5	EasyFLO Mono (má crom)		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.
6	EasySET		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.
7	EasySET 250 mm Square Brass Rain Shower Head		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.
8	Acacia SupaSleek Vessel 600mm Single-Hole		The sanitary fittings are designed to be durable, aesthetically pleasing, and user-friendly, with a strong focus on enhancing the overall user experience.

# Appendix

## Design Story – *Limit to 150 words per answer.*

- What is the inspiration for your design?

The design is inspired by childhood memories of the older generation rooted in rural life, especially experiences related to water such as bathing in the rain and playing with water, along with the familiar sensations of terracotta bricks, firelight, and the warm atmosphere of family living spaces.

- How does the design fulfill the need of the target users?

The space is organized for a three-generation family by dividing it into three separate functional zones: bathing, washing, and toilet, allowing multiple users to use the space simultaneously. The bathing area is designed to be flexible, combining a standing shower with a shallow bathtub where children can safely play with water. A movable low seating platform responds to the squatting habits of elderly users and supports daily activities such as hand washing clothes or bathing children.

- How does the design fulfill the design challenge?

The main challenge is to design a bathroom with limited area while accommodating diverse needs across generations and creating emotional value and connection. This is addressed through optimized layout planning, clear functional zoning, and a layered spatial experience. Elements such as layered lighting, colored translucent surfaces, and warm materials help create a sense of connection between family members without compromising privacy. As a result, the bathroom functions not only efficiently but also as an experiential space that transforms daily routines into moments of relaxation and bonding.

- How does the choice of products contribute to the purpose of the design?

Product selection plays an important role in realizing the design concept. The shower system evokes the sensation of bathing in the rain, while the smart toilet provides comfort and convenience for users of all ages. Different water modes offer varied experiences for both children and adults, enhancing everyday use.

Let your ideas transform  
everyday routines into  
meaningful experiences!
