## Design Entry Template

# Design Entry Template Guidelines

You will find the following slides in this Submission Template with specific titles and requirements for your submission as indicated below. Total number of your submission should not exceed 15 slides, beginning with (Slide 1: Project Name) and ends with (Slide 15: Qualification Checklist).

**SLIDE 1:**  
**Project Name**

Input a concept title that reflects your idea.

**SLIDE 2:**  
**Design Concept**

Describe your concept in a nutshell,  
keep it within 150 words.

**SLIDE 3:**  
**Design: Floorplan and Elevations**

Organize your drawings to tell your story.

**SLIDES 4-10:**  
**Design: Visuals**

Present your concept with your renderings.

- Slide 4: Overview
- Slide 5: Full Bathroom
- Slide 6: Shower Area
- Slide 7: Toilet Area
- Slide 8: Basin Area
- Slide 9 & 10: Optional Images/Information

**SLIDE 11-12:**  
**Specifications: Colors, Materials and Finishes**

**SLIDE 13:**  
**American Standard Products Specified**  
List down the products that are used in your design.

**SLIDE 14:**  
**Appendix**  
Elaborate your design story.

**SLIDE 15:**  
**Qualification Checklist**  
Before submission, review this list.

*The Gate:*  
Treasures of Life  
**ASDA26-31737**

*American Standard*

# Design Concept Summary

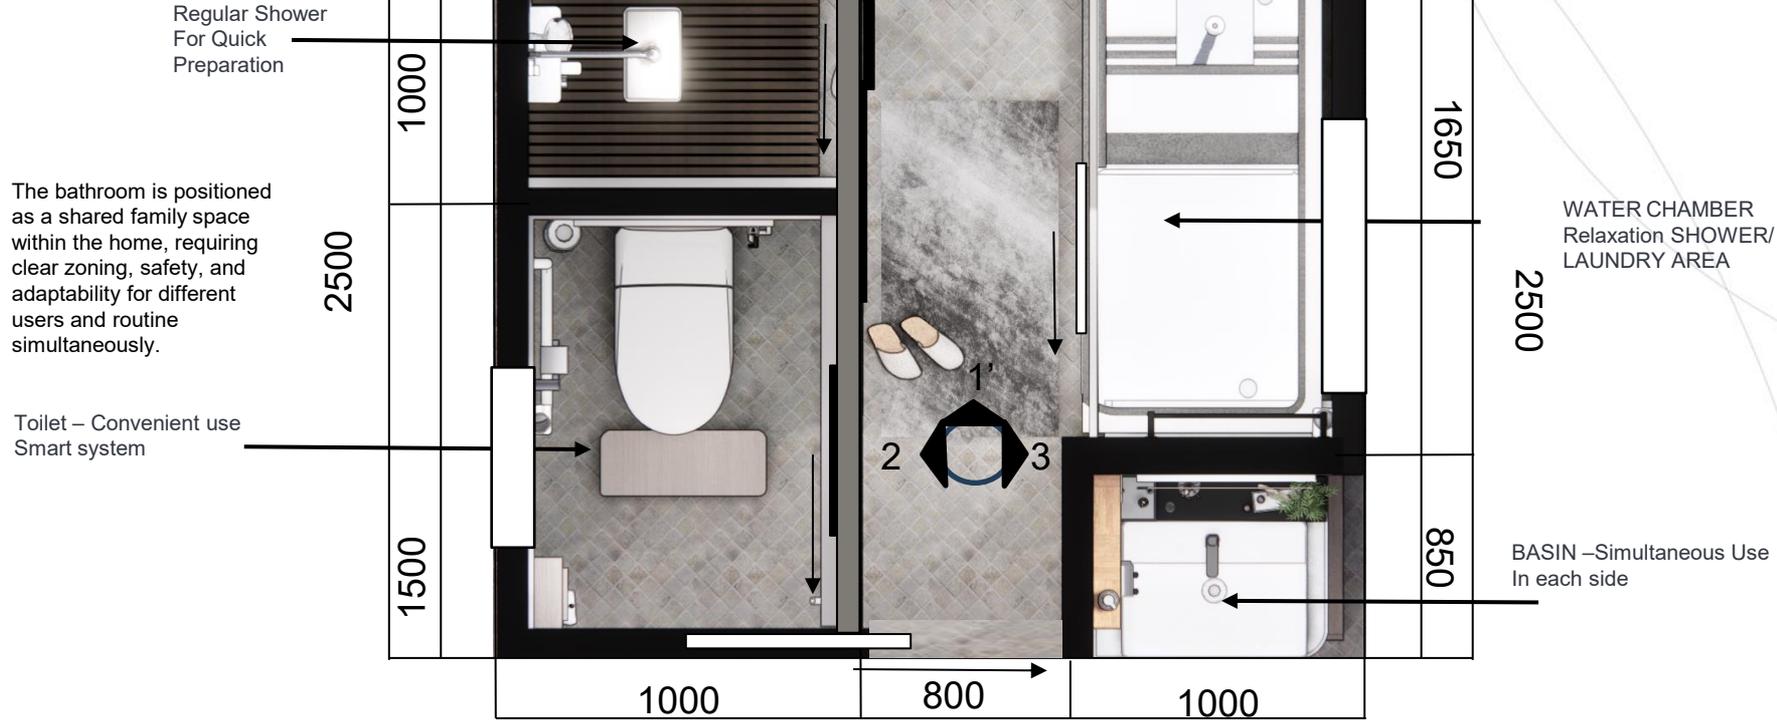

**The Gate** reimagines the residential bathroom as a controlled water environment designed for everyday multigenerational living. “*Ang tarangkahan ng alala kasiyahan at kasaganaan*” (The Gate of Memories Joy and Fruitfulness) At the heart of the space is a built-in water containment chamber that functions as a gate between wet and dry zones, regulating water use while organizing daily activities within a compact 6–7 sqm layout. Unlike a conventional bathtub, the chamber is enclosed by walls and allows adjustable water depth, enabling safe assisted bathing for the elderly, supervised bathing for children, and multifunctional use such as laundry and soaking. This controlled threshold minimizes water spread, enhances safety, and improves hygiene and ease of maintenance. The surrounding layout prioritizes clear circulation, ergonomic fixture placement, and subtle safety integration to support independence and assisted use when needed. By redefining how water is contained and used, *The Gate* transforms the bathroom into a flexible, practical, and humane space that adapts to the evolving needs of a shared family household.

# Design: Floor Plan and Elevations

Total Bathroom Area  
in sqm (including wall  
& columns)

7 Sq. M

The bathroom is positioned as a shared family space within the home, requiring clear zoning, safety, and adaptability for different users and routine simultaneously.

Toilet – Convenient use Smart system

Regular Shower For Quick Preparation

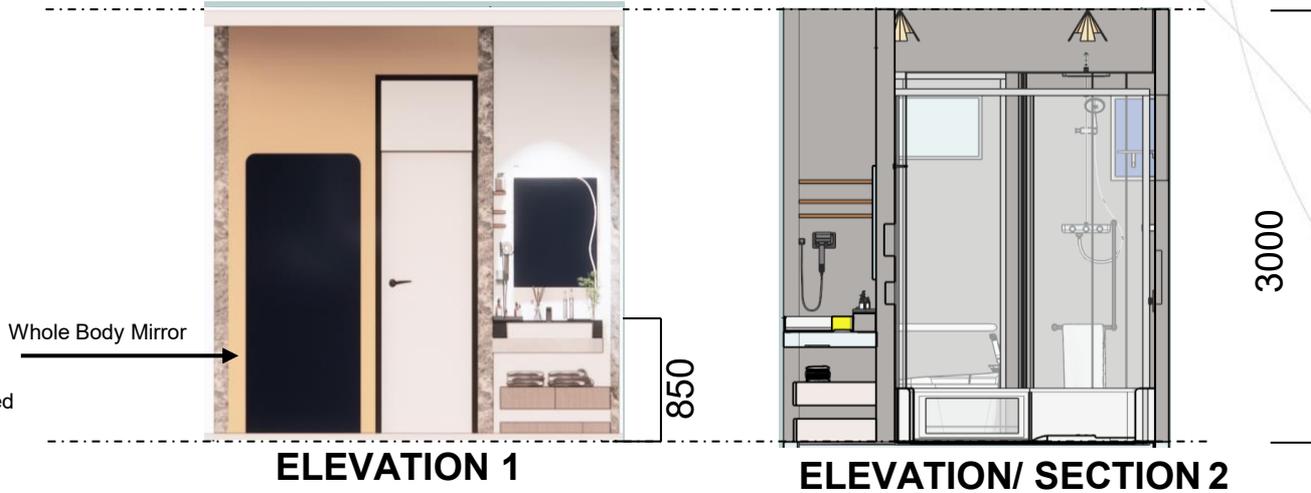

WATER CHAMBER Relaxation SHOWER/ LAUNDRY AREA

BASIN – Simultaneous Use In each side

## FLOOR PLAN

# Design: Floor Plan and Elevations

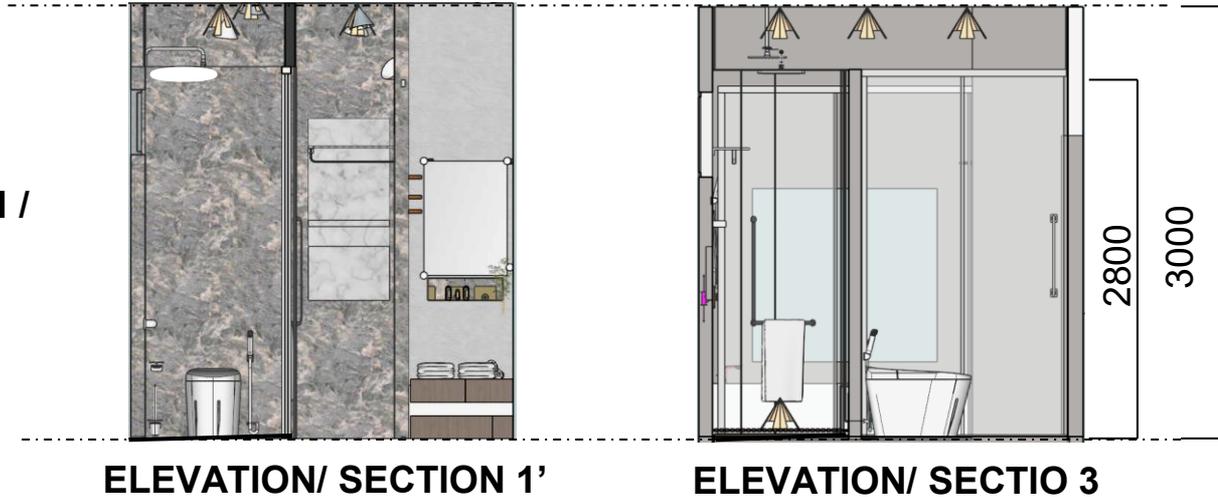

The bathroom is positioned as a shared family space within the home, requiring clear zoning, safety, and adaptability for different users and routines.

Total Bathroom Area  
in sqm (including wall  
& columns)

7 Sq. M

## ELEVATION / SECTION

## Design Visuals: Overview

The overall space is organized around a central clear circulation zone, with the water containment chamber acting as a spatial and functional anchor.

*The Gate* is a built-in water containment chamber that redefines how water is managed within a compact residential bathroom. Positioned as the threshold between wet and dry zones, it controls water spread while organizing multiple daily activities within a single, enclosed system. Unlike a conventional bathtub, *The Gate* allows adjustable water depth through its internal configuration, enabling safe assisted bathing, supervised use for children, and multifunctional activities such as laundry and cleaning. Enclosed walls, controlled drainage, and integrated shower fixtures enhance safety, hygiene, and ease of maintenance. By acting as both a spatial divider and functional element, *The Gate* transforms the bathroom into a flexible and efficient water environment that adapts to the evolving needs of a multigenerational household.

# Design Visuals: Full Bathroom

The full bathroom is organized as a compact yet flexible space that supports diverse daily routines through clear zoning and controlled water management. The toilet area is positioned within the dry zone, using wall-hung fixtures to improve hygiene, ease of cleaning, and accessibility for multigenerational users. The basin area supports daily grooming with ergonomic controls, adequate counter space, and clear circulation, allowing use by children, adults, and elderly users. A regular shower area provides efficient, everyday showering with stable water temperature and slip-resistant finishes. At the core of the design is the multifunction water containment chamber, which serves as a controlled wet zone for assisted bathing, child use, laundry, and soaking. Acting as a gate between wet and dry spaces, the chamber minimizes water spread while enabling adjustable water depth and multifunctional use. Together, these facilities create a practical, safe, and hygienic bathroom environment designed for everyday multigenerational living.

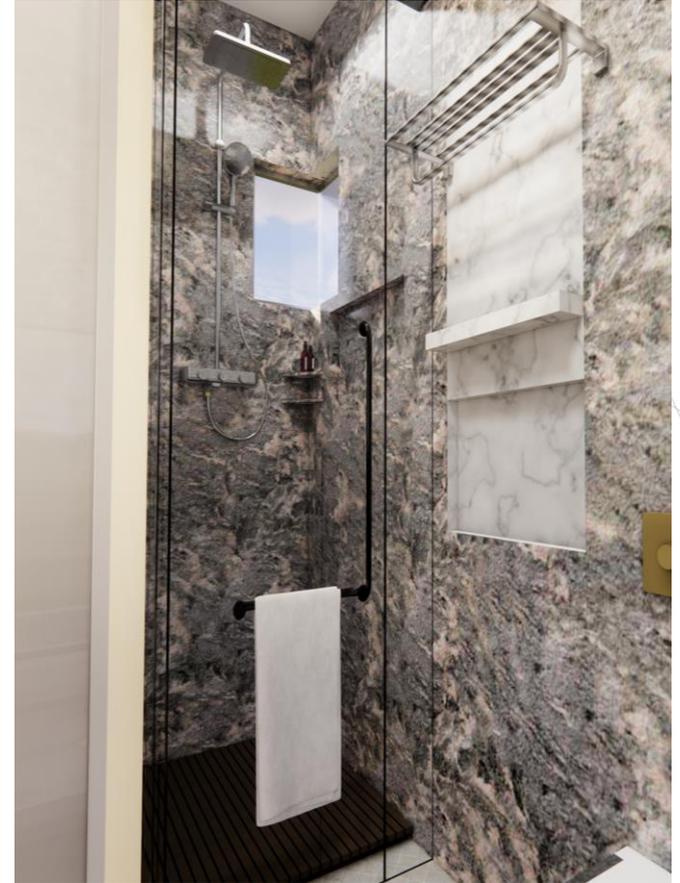

## Design Visuals: Shower Area

The Bathroom has **two showers** for simultaneous use for the family, specially in the time of hurry and everyone needs to prepare fast and quickly in the morning.

The first one is the regular shower area use for immediate purposes provided a natural light and ventilation , while the other one is What I call "**The Gate**", a **combination of Shower and Water chamber** that serves a multi-functional sub-room for an exiting moments of everyone in the family.

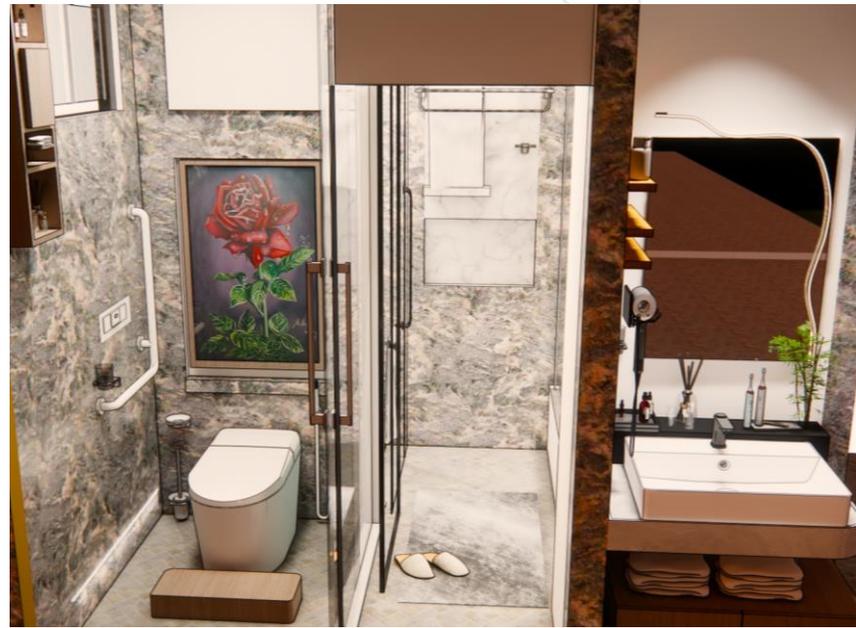

And sometime no one deny that we need to relax after a long day of stress, everyone really enjoy a splash of warm water like in a mini pool. Young people and even young at heart.

# Design Visuals: Toilet Area

The toilet area is designed for hygiene, ease of cleaning, and comfort across age groups through ergonomic heights and incline drained. American standard products to assist the operations.

It uses the latest AMERICAN STANDARD PRODUCT: THE Elite Shower Toilet. That gives convenience for maintenance and use for every needs. Natural light and ventilation is also considered for better room experience; thus, an exhaust fan was also provided to eliminate unnecessary smell and keep temperature appropriate. In addition, 2% Slope from the drain is also provided for easy cleaning and keeping the area dry. A foot stool is also provided to maintain the comfortable position in releasing unwanted materials in our body.

## Design Visuals: Basin Area

The basin area supports daily routines with accessible controls, clear counter space, and hygienic fixtures suitable for both children and elderly users.

The basin purposely put outside the other facilities of the bathroom, to make sure that everybody can use it undisturbed by the other users of the bathroom. Simultaneously every member of the family can use it. Moreover, the Two –Sides of the basin is also open for free use purpose.

## Design Visuals: Optional Images/ Information

The chamber has two gates, it is strategically placed to maintain the feature of being a walk-in shower, thus a water trapper. First is the entrance gate, so the elders don't need to step up just to get there.

The other is the middle gate, it serves as trapper for the chamber to use smaller portion and serve as a water container for multi-purpose use such as laundry and other cleaning activities.

It provided a tactile rubber  
For safety purposes.

The built-in water containment  
chamber regulates water use  
through enclosed walls and an  
adjustable internal level,  
enabling bathing, assisted  
care, and laundry while  
minimizing water spread.

# Specifications: Colors, Materials and Finishes

Warm neutral and earth tones and matte finishes are used to create a calm, residential atmosphere while enhancing slip resistance and ease of maintenance. The Flooring has a tactile feature that serve as anti-slip

This Tissue holder is a must specially in the toilet area, where accessibility measure play a vital role for necessity that easy to grab. |

# Appendix

## Design Story – Limit to 150 words per answer.

- What is the inspiration for your design?

The Gate is inspired by everyday water practices in Asian households, where water is carefully contained, reused, and shared across multiple daily activities. Rather than treating water as something to be quickly drained away, the design draws from the idea of a threshold—a controlled boundary that separates dry and wet spaces while allowing flexibility in use. This concept reflects familiar domestic routines such as assisted bathing, washing, and laundry within limited space, especially in multigenerational homes. Aside from that, the idea of the gate is how the day started as a family, how it opens the gate to bond and start the day with delight and compassion. By transforming the bathroom into a managed water environment, The Gate responds to real household behaviors, emphasizing safety, efficiency, and adaptability. The design reframes the bathroom not as a static room, but a room with love and resonates bond. But aside from all of this, it inspired by my *Lola (Grandmother) Reminiscing the time she was still here, always in-charge of taking care of me, taking me to bath and always telling that she loves me.*

- How does the design fulfill the need of the target users?

**“The Gate” fulfills the ASDA design challenge by addressing the diverse needs of a multigenerational family within a compact residential bathroom through purposeful, adaptable, and hygienic design.** The layout is organized around a built-in water containment chamber that functions as a controlled threshold between wet and dry zones, improving safety, minimizing water spread, and supporting assisted use for elderly users. Adjustable water depth and ergonomic controls allow the space to accommodate children, parents, and seniors with varying physical abilities. Hygiene and ease of maintenance are enhanced through clear zoning, wall-hung fixtures, and the selection of water-efficient, easy-to-clean American Standard products. Multifunctional use, including bathing and laundry, responds to real everyday household routines while optimizing limited space. By combining thoughtful planning, safety-driven details, and realistic product integration, *The Gate* delivers a feasible residential bathroom solution that balances comfort, convenience, and long-term usability for multigenerational living.

- How does the design fulfill the design challenge?

**The Gate fulfills the design challenge by creating a safe, adaptable, and hygienic bathroom for multigenerational use within a compact space.** A built-in water containment chamber acts as a gate between wet and dry zones, reducing water spread and improving safety. Adjustable water depth and ergonomic fixtures support children, adults, and elderly users, including assisted bathing. Clear zoning, wall-hung elements, and water-efficient American Standard products enhance hygiene, ease of maintenance, and everyday usability, resulting in a practical and feasible residential bathroom solution.

- How does the choice of products contribute to the purpose of the design?

**The selected American Standard products support the purpose of the design by enhancing safety, hygiene, and adaptability within a compact multigenerational bathroom.**

Thermostatic shower controls ensure stable water temperature for children and elderly users, while adjustable hand showers enable assisted bathing, cleaning, and laundry within the water containment chamber. Wall-hung toilets and vanities improve hygiene and ease of maintenance by keeping the floor clear and dry. Water-efficient and ergonomic fixtures promote everyday usability, allowing the bathroom to function as a controlled, flexible space that supports diverse family needs safely and efficiently.

● **Before you submit, let's check that everything's in place**

*A friendly reminder to check that your entry follows the required template and is complete!*

- Please make sure the Participant ID is clearly indicated on Slide 1 – remember, only one participant per entry (no group work) and one submission per login account.
- Ensure your entry is an original design created by you.
- The size of the bathroom in your design should fall within the allowable range (6-7sqm).
- Please confirm that you are not a relative of any LIXIL employees or closely related persons of LIXIL employees or judges.
- Ensure that you reside within the participating countries and are attending studies full-time at a university or educational institution in the specified countries.  
*Participating countries include: ANZ (Australia and New Zealand), Indochina (Cambodia, Laos, and Myanmar), Indonesia, Philippines, Thailand, and Vietnam.*
- Lastly, only American Standard products should be used in your renderings.

Let your ideas transform  
everyday routines into  
meaningful experiences!

*American Standard*
