Design Concept Summary

Amidst the relentless bustle and pollution of city life, I have crafted a "closed sanctuary" that isolates the family from external chaos. This space acts as a private oasis where noise and smog fade away at the doorstep. To prevent any sense of confinement in the limited area, I integrated advanced air purification systems, ensuring a breath of fresh air as pure as the countryside for all three generations.

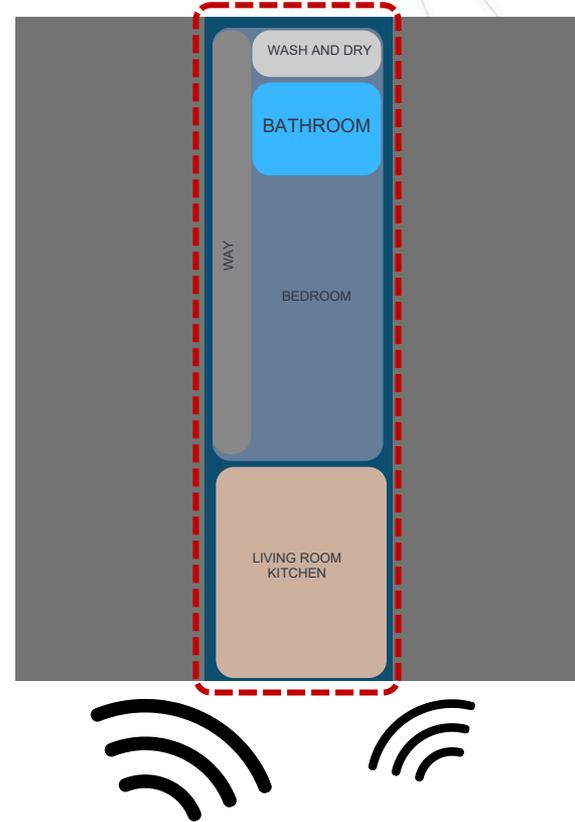

The synergy of modern, whisper-quiet fixtures and smart artificial lighting—which mimics natural circadian rhythms—keeps the space vibrant and soothing without the need for open windows. With a clear and coherent layout, the design prioritizes safety for the elderly and ease of use for children. Here, technology serves as a protective layer that restores peace. It is more than just a bathroom; it is a soulful retreat for mental recovery, helping the family find tranquility in the heart of the urban jungle.

CURRENT LIVING
ENVIRONMENT

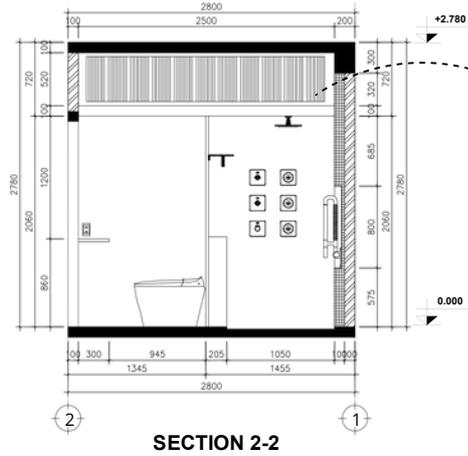

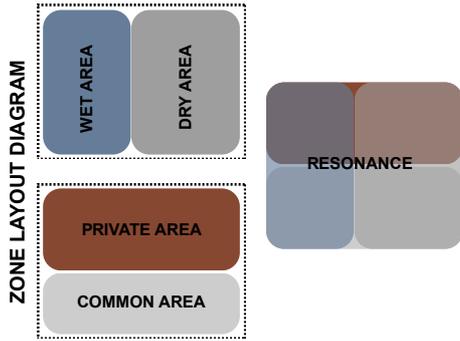

In the context of contemporary residential housing, buildings are constructed very close to one another, resulting in high density, limited living space, poor ventilation, and declining air quality, which contributes to environmental pollution.

EXISTING RESIDENTIAL
HOUSING

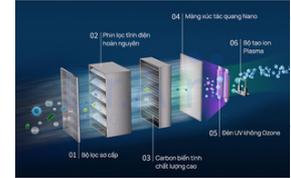

Design: Floor Plan and Elevations

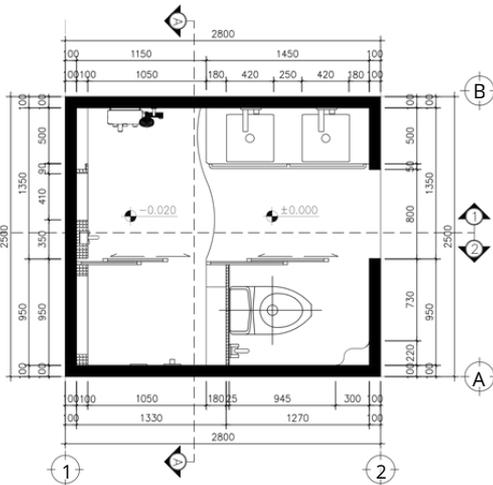

THE SPACES ARE CLEARLY AND COHERENTLY ARRANGED, RESONATING WITH ONE ANOTHER TO CREATE A SENSE OF SPACIOUSNESS WITHIN A LIMITED AREA.

Design
Visuals:
Basin
Area

“The washbasin area is inspired by the overlapping layers of traditional Vietnamese roof tiles, expressing family unity, shared harmony, and the bonding between generations.”

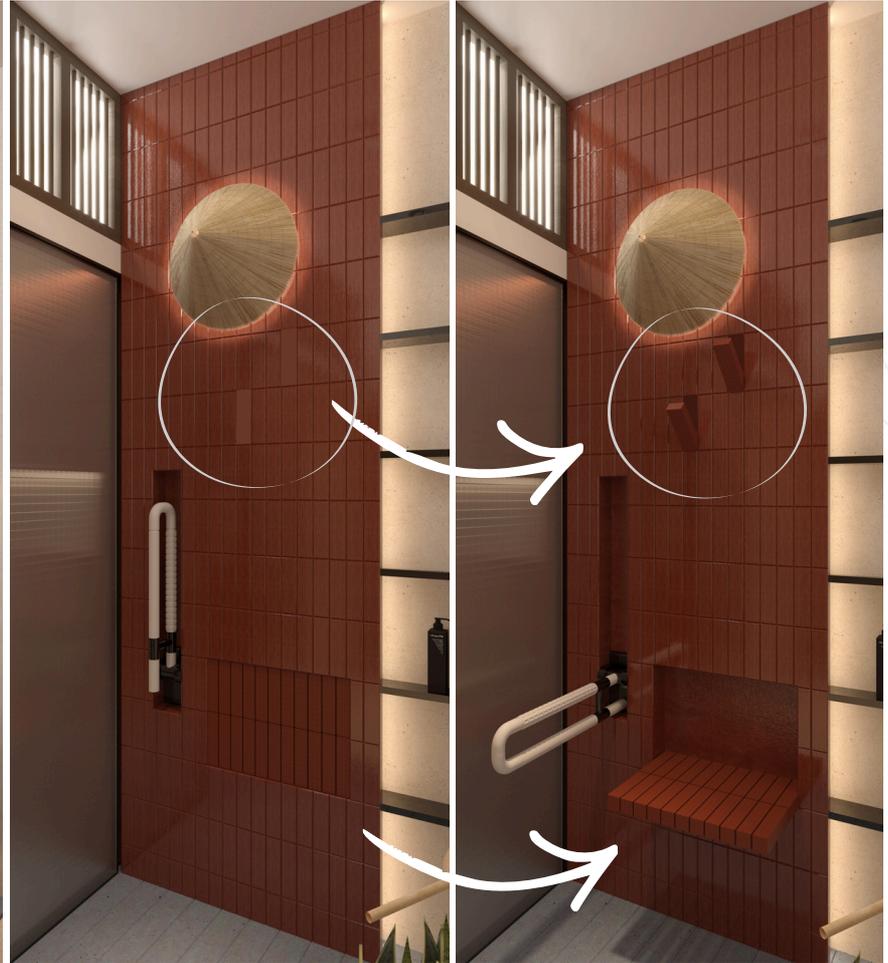

Design Visuals:

MULTI-PURPOSE AREA

The multifunctional corner incorporates a hand shower and a water jar, contributing to the reinterpretation of traditional daily practices and emphasizing Vietnamese cultural values in a contemporary context.

Design Visuals: Shower Area

“The bathing space incorporates a storage unit combined with a foldable seating element, allowing flexible use and efficient space optimization.”

Design Visuals: Toilet Area

“The Đông Hồ folk painting ‘Hái Dừa’ is displayed in the toilet space to evoke the spirit of unity and bonding in Vietnamese family life, while also affirming that the toilet today is no longer viewed as a dirty place but as a clean, civilized, and well-considered living space.”

A built-in wall cabinet for sanitary items helps keep the space clean, tidy, and uncluttered without taking up usable area.

Specifications: Colors, Materials and Finishes

Using a diverse range of materials with variations in surface textures and colors, thoughtfully transformed and organized within the space, creates a harmonious and cozy atmosphere rich in nostalgic character. The subtle coordination of colors helps stimulate the senses, bringing inspiration and positive emotions to users in their everyday experience.

American Standard Products Specified

I believe that American Standard products effectively meet the needs of family bathrooms thanks to their harmonious combination of functionality, durability, safety, and aesthetics. The brand offers solutions suitable for a wide range of users, especially multi-generational families, while also enhancing quality of life and the overall daily bathroom experience.

Acacia Evolution Toilet Brush
FFAS1386-908500BF0

Acacia Evolution Towel Shelf
FFAS1395-908500BF0

EasySET 250 mm Square Brass Rain Shower Head
FFASS038

Appendix

Design Story – Limit to 150 words per answer.

- What is the inspiration for your design?

The inspiration originates from "Countryside Memories"—a bridge connecting the bustling urban present with a serene, nostalgic past. This "Urban Oasis" tells a story of heritage, helping the elderly rediscover a sense of belonging while nurturing a deep cultural connection for the younger generation. The design transforms daily hygiene routines into a meditative journey, grounding the soul in the profound tranquility of home.

- How does the design fulfill the need of the target users?

The space can accommodate at least 5 people simultaneously. It ensures aesthetics and, most importantly, safety for children and the elderly through supportive equipment.

It creates additional MULTI-FUNCTIONAL space to meet everyone's essential needs.

- How does the design fulfill the design challenge?

The primary challenge was transforming a cramped, suffocating space in a polluted neighborhood into a serene "oasis." I implemented a "completely enclosed sanctuary" structure to provide absolute isolation from urban smog and noise. Functional areas are arranged with clarity and coherence, creating a spatial resonance that expands the visual depth despite the limited footprint.

Modern technology entirely replaces traditional windows: specialized air purifiers supply a continuous flow of fresh air, while smart lighting systems mimic the sun's natural trajectory to keep the space vibrant. The presence of this "artificial sunlight" not only solves the lack of light but also revitalizes the elderly, dissolving feelings of confinement and isolation. This allows them to find mental freedom and absolute tranquility even in the heart of a dense, bustling city.

- How does the choice of products contribute to the purpose of the design?

The products enhance the user experience and have safety features to ensure safe use for children and the elderly.
